REPORT · JULY 2026

AK Technologies – B2B Off-Page SEO & Citation Submission Guide

AK Technologies Strategy Team

July 2026

1. Executive Summary & Goals

This guide outlines the B2B Off-Page SEO, GEO, and AEO strategy for AK Technologies. Off-Page SEO is no longer just about building backlinks to rank on Google search results. In 2026, it is equally about establishing entity authority so that generative search engines (like ChatGPT, Gemini, Claude, and Perplexity) index, verify, and suggest your business to prospects asking for AI automation and software development services.

> **Key Target: Build consistent citation nodes linking the business name (AK Technologies), the founder (Tehmina Akram), and core services (n8n workflow, WhatsApp Business API, CRM/ERP development) across high-authority B2B platforms.**

2. High-Authority Directory Submission List

Your team must submit and verify AK Technologies profiles on the following high-priority platforms. These are selected because they are heavily crawled by both Google and generative AI engines to compile recommended agency lists:

	Type & Authority
	Top B2B Directory (DA 72)
	Local Maps SEO (GMB)
	Business Databases (DA 91)
	Professional Entity Node
	B2B Software & Services
	Agency Directory (GCC focused)
	Service Provider Listing
	Public Reviews & Trust (DA 92)
	Tech Agency Directory

	Local Citation (Lahore/KHI)

Table 1: Prioritized list of platforms for business listing and citation creation.

3. Copy-Paste Business Listing Templates

3.1 Profile Creation Specifications

- Official Name: AK Technologies
- Official Website: https://aktechnologies.online/
- Founder & CEO: Tehmina Akram
- Founder LinkedIn: https://www.linkedin.com/in/tehmina-akram/
- Business Email: ikkhanbak@gmail.com
- Business Phone: +92 331 9059411
- Primary Office: Main Boulevard, Lahore, Punjab, Pakistan (Postal Code: 54000)

3.2 Company Bios (Copy & Paste)

Short Description (Under 150 characters — for simple listings):

> **AK Technologies is a premier AI automation agency and software development company specializing in custom AI agents, WhatsApp Business API automation, n8n/Make workflows, and custom CRM/ERP database integrations.**

Long Description (For Clutch, G2, LinkedIn, Sortlist):

AK Technologies is a leading AI automation agency and custom software development company based in Lahore, Pakistan, serving B2B clients globally across Pakistan, the GCC (Dubai, Abu Dhabi, Riyadh, Jeddah, Qatar), the United Kingdom, and the United States.

Founded by Tehmina Akram, we help fast-growing organizations replace slow, manual, repetitive administration workflows with custom-engineered intelligent systems. Our core capabilities include:
• Custom AI Chatbots & LLM/RAG Integrations (trained on company private data)
• WhatsApp Business API Automation (qualifying leads, booking slots, support 24/7)
• n8n.io and Make.com Workflow Integrations (connecting HubSpot, Salesforce, etc.)
• Custom CRM/ERP Database Development (eliminating disjointed sheets and reconciliation errors)
• Local Market Domination & Local SEO Automation (Google Maps / GBP optimization)

We focus on practical, measurable ROI — identifying manual bottlenecks, mapping daily workflows, and building automation that saves hours, recovers lost leads, and scales sales pipelines. Direct access to the developers, direct founder-led implementation, and zero vendor lock-in.

3.3 Standard Service Offerings & Tagging

When directories ask you to select categories or tags, use these exact matches to align with search volumes:

- AI Development & Artificial Intelligence Consulting
- Software Development & Database Integration
- WhatsApp Business API & Conversational AI Chatbots
- n8n and Make.com Workflow Automation Consulting
- HubSpot & Salesforce CRM Integration

4. Complete 4-Week Action Plan

Week 1: Critical Profiles & Local SEO Setup

1. Task 1: Google Business Profile (GBP) Verification: Set up the physical location in Lahore using the verified name 'AK Technologies'. Verify the profile via video/phone. Fill in description, phone, email, and add service catalog.
2. Task 2: Clutch.co Profile Creation: Register using the business email. Submit the long description, add service categories, and link Tehmina Akram's founder profile.
3. Task 3: LinkedIn Organization Sync: Ensure the company page matches the updated logo and description. Connect Tehmina Akram's personal profile as the Founder & CEO of the company page.
4. Task 4: Crunchbase Listing: Create organization record for AK Technologies. Add founder, website, address, funding (bootstrap), and service offerings.

Week 2: B2B Review Platforms & GCC Listings

1. Task 1: G2 & GoodFirms Submission: Submit profile details in the IT Services category. Fill in all metadata tags, technical platforms used (Python, n8n, Make, OpenAI API, Claude API), and target countries.
2. Task 2: Sortlist Setup: Fill in agency profile on Sortlist. Focus targeting on GCC countries (Dubai, Riyadh) by selecting 'Middle East' serving capability. Add WhatsApp automation as core service.
3. Task 3: Trustpilot Setup: Claim the business profile on Trustpilot. Set up standard automated review invites for past clients.

Week 3: Tech Agency Profiles & Review Campaigns

1. Task 1: ITProfiles & Local Directories: Submit listings to ITProfiles.com, PakistanBiz, and local Pakistani business directories using identical Name, Address, and Phone (NAP) details.
2. Task 2: Launch Client Review Campaigns: Reach out to your 30+ completed project clients. Ask them to submit 5-star reviews on Clutch and Google Maps. Propose a simple template for them to copy and paste to make it easy.
3. Task 3: Portfolio Sync: Upload screenshots and brief summaries of your 6 case studies to Clutch and G2 to populate your portfolio grids.

Week 4: AI Indexing & Authority Verification

1. Task 1: index.xml & Google Search Console: Submit sitemap.xml to Google Search Console. Request indexing for index.html, about.html, services.html, and faq.html.
2. Task 2: Bing Webmaster Tools: Submit the sitemap to Bing as well (since Bing feeds Copilot and many AI search indexes).
3. Task 3: Trigger AI Crawler Crawls: Submit your new about.html URL to index ping tools. Search for 'AK Technologies Lahore' on Perplexity and ChatGPT with web-browsing active to force them to crawl the new live data and verify the founder entity linkage.

5. KPIs & Progress Tracker

Have your team track performance weekly using this list. AI citations take 15–30 days to populate after directory submission, as models run their periodic updates.

- Directory Listings Verified: Count of active profiles (Target: 10+ listings in 30 days)
- NAP Consistency: Ensure 'AK Technologies', 'Main Boulevard, Lahore', and '+92 331 9059411' are identical across all sites (Google looks for matching signatures)
- Client Reviews Submitted: Count of reviews on Clutch and Google Maps (Target: 5+ reviews in month 1)
- Perplexity / ChatGPT Search Test: Ask the bots: 'Who founded AK Technologies AI?' (Target: Bot answers 'Tehmina Akram' with citation to the about page)
